## Kāpiti Coastal Hazard Survey

#	OTHER (PLEASE SPECIFY)	DATE
1	Please keep vehicles off the beaches to preserve bird nesting sites and shellfish beds. Please police illegal activity and put up barriers to stop vehicles on beaches. Control designated launching sites.	1/5/2021 4:24 PM
2	sustainable future preserving nature as much as possible	12/26/2020 1:35 PM
3	Restriction of vehicular access, control of dogs and other animals	12/26/2020 12:35 PM
4	Increasing biodiversity and support fish stocks to recover by creating marine reserves so that 1/3 of Kapiti coast is reserve.	12/25/2020 2:51 PM
5	vehicle useage	12/23/2020 7:34 PM
6	Respect for the coastal stewardship and knowledge of the community who live on the coastline.	12/23/2020 4:55 PM
7	Stop developing on the coast	12/23/2020 2:48 PM
8	Stopping beach erosion by building groins and protective "wave force structures", followed by replanting.	12/23/2020 9:20 AM
9	Keeping the beach a safe place for birds and people by stopping the use of motorbikes and trail bikes - these are a loud, dangerous and constant problem	12/23/2020 7:27 AM
10	Managed retreat from sea level rise/increased storm damage	12/23/2020 6:48 AM
11	Ensuring that risks are managed over the realistic timeframes (decades for climate change, not years; promptly for existing coastal hazards).	12/22/2020 8:44 PM
12	Much improved access for all races, genders, ages, abilities / disabilities. Some way to make contact at various points along the beach in case of offence by someone of another race, gender, age, ability / disability. Build a separate toilet and swimmer/ changing room block at Otaki. The 1960 shack is a disgrace - but this council can spend \$2.86million for a gateway for non-existent tourists but locals have to pee on the beach. Keep the historic pavilion. Do not destroy it. What will KCDC do? Demolish the pavilion, put a single self cleaning wc on the site. KCDC don't care a hoot about Otaki - this is Raukawa, not Te Raparaha Ngati Awa territory.	12/22/2020 5:19 PM
13	I'm surprised and disappointed not to see anything about protecting habitat and biodiversity and protection and encouragement of developing dunes	12/22/2020 4:15 PM

## Q4 How well informed do you consider yourself to be on coastal hazards in the Kāpiti coast?

Answered: 81 Skipped: 7

ANSWER CHOICES	RESPONSES	
Uninformed	0.00%	0
Not well informed	6.17%	5
Have some idea	28.40%	23
Well informed	43.21%	35
Very well informed	20.99%	17
Other (please specify)	1.23%	1
<b>TOTAL</b>		<b>81</b>

#	OTHER (PLEASE SPECIFY)	DATE
1	Informed and have some concerns about reality of information provided for residents	12/26/2020 12:42 PM

## Q5 Have you seen/ experienced changes on the Kāpiti beachfront?

Answered: 81 Skipped: 7

ANSWER CHOICES	RESPONSES	
No, the coastal area(s) appear the same to me as they did when I first saw them	7.41%	6
Yes, I've seen minor changes in Kāpiti	23.46%	19
Yes, I've seen major changes in Kāpiti	27.16%	22
Yes, but changes vary along the Kāpiti coastline	41.98%	34
I don't know. I haven't been in Kāpiti long enough	11.11%	9
Can you expand on the changes (if any) observed?	41.98%	34
Total Respondents: 81		

## Kāpiti Coastal Hazard Survey

#	CAN YOU EXPAND ON THE CHANGES (IF ANY) OBSERVED?	DATE
1	minor dune erosion and river mouth movement/instability	1/30/2021 3:34 PM
2	Significant erosion of the cliffs/dunes through the length of QE Park - estimate 10 to 15m in the 14 years we have lived here	1/22/2021 10:17 AM
3	Raumati south/beach erosion Sand dune erosion Manly street Q2 park erosion more rau south/beach seawalls	1/19/2021 1:08 PM
4	increased accretion	1/18/2021 2:57 PM
5	General accretion north of the cusplate foreland, erosion to the south	1/11/2021 12:18 PM
6	QE Park deliberately allowed to degrade by Council(s). Lack of proactive maintenance to sea walls which were well built but now only get reactive care	1/3/2021 10:28 AM
7	dune erosion in several places, exacerbated by the artificial stream outfall at Field Way.	12/28/2020 8:55 AM
8	Changes are short term (annual) and long term (decadal). There are the natural - sand level and edge of dunes which are variable both along the coast and with time; and there is the human generated - prime is the residential coastal development that takes up an increasing amount of the foreshore with increasingly expensive properties. re your question 6 below - define "significant" - a very wooly question	12/27/2020 5:01 PM
9	Waikawa river moves up and down the coast all the time (a natural process interrupted by bulldozing a channel occasionally)	12/27/2020 4:49 PM
10	Erosion at Raumati and near the Waikanae River mouth	12/26/2020 7:06 PM
11	Erosion of dunes and damage to seaside structures/restraints	12/26/2020 6:13 PM
12	SpinFex warls	12/24/2020 8:56 PM
13	much erosion on southern beaches much depletion of shell fish at Otaki beach	12/23/2020 7:34 PM
14	Inundation at varying places along the coast	12/23/2020 5:18 PM
15	I've lived on the coast for a number of decades, and all sandy coastlines experience minor changes from time to time. As a result of winds, tides, rain occasional flooding. The Kapiti coastline has formed over thousands of years of gradual accretion. These processes continue today, particularly on the cusplate foreland.	12/23/2020 5:02 PM
16	35 metres of accretion in front of my property since 2001. Erosion of private property in some other areas	12/23/2020 3:08 PM
17	Erosion. Water collecting where building in wetlands is happening. Kcdc Messing with the whenua.	12/23/2020 2:50 PM
18	30 years ago there was a dry beach strip all the way from Paekakariki to Paraparaumu, even at high tide. At low tide the sandy beach was several hundred meters wide.	12/23/2020 2:20 PM
19	Within the last 8 years, I have seen some interesting changes along the rocks at the base of the retaining wall in Raumati South. Eight years ago, there were no signs of sea life within the rocks. Now you will see there are many spots where small mussels and seaweeds have attached themselves to the rocks. This suggests to me that water hits those rocks often enough that sea life have begun to see it as an area to live. I would think this must be due to rising sea levels, more frequent storm surges, etc. While this has happened in Raumati South, I can see different changes elsewhere (e.g. storm events that have damaged retaining walls in other parts of Raumati Beach and Paraparaumu).	12/23/2020 2:19 PM
20	Waikanae river mouth changes frequently. Also the Waimeha stream. The stream is frequently redirected away from the dunes to run straight down the beach and changes frequently following storms	12/23/2020 2:18 PM
21	Waikanae Beach sand dunes have been eroding especially at the northern end from the stream to Peka Peka Why is this not noted under question 6???	12/23/2020 1:25 PM
22	coastal erosion around Raumati area.	12/23/2020 12:00 PM
23	Accretion of sand. Invasion of exotic plants. Silting in Waikanae estuary.	12/22/2020 11:44 PM
24	Lots of erosion	12/22/2020 9:49 PM
25	Positives: Accretion of the dunes north of Waikanae estuary providing an effective buffer to storm erosion and habitat for wildlife. Coastal improvements with walkways and cycleways Negatives: Vulnerability of coastline south of Manly Street to erosion from storm surges and	12/22/2020 9:12 PM

## Kāpiti Coastal Hazard Survey

flooding Loss of wildlife habitat and natural form of the coastline through increasing urbanisation Inevitable loss of Waikanae estuary's natural values and beaches through failure to manage shingle buildup Threats from population growth to water supplies

26	Accretion north of the Paraparaumu/Raumati boundary, erosion south of that point. But that is only true for the last several decades; earlier than that there was significant accretion in the Raumati area and erosion around the Waikanae River.	12/22/2020 8:53 PM
27	Yes, but why would I? Council's shove stuff around at various places. What point commenting? Also what is the time frame for noticing change? Poor question.	12/22/2020 5:24 PM
28	Mainly erosion of dunes and exposure of storm water pipes	12/22/2020 4:41 PM
29	Protection of the coastal strip from extensive vehicle use.	12/22/2020 4:17 PM
30	Coastal erosion in QE Park - bigger storm surges	12/22/2020 3:42 PM
31	Have observed erosion here at Raumati Beach and accretion further north around Paraparaumu Beach	12/22/2020 3:39 PM
32	Ive seen erosion at times at the dunes along peka peka beach (eroding the slopes of the dunes), and then (at some later time) followed by accretion. Its hard to know what the overall effect is.	12/22/2020 3:24 PM
33	Definite erosion of the Elizabeth Park dunes... and waiting, waiting, waiting, for the pathway to be re-opened.	12/22/2020 3:05 PM
34	As I have only lived her for 2 years the changes I have noted are an increase in seawalls in Raumati and dune erosion at QE2 park resulting in the loss of walking tracks and exposure of middens.	11/17/2020 1:14 PM

Q6 In your opinion, what areas of the Kāpiti beachfront are/ are not experiencing change? Note: No change (1) – Significant change (5)

## Q7 Do you think coastal hazards on the Kāpiti coast are:

Answered: 81 Skipped: 7

ANSWER CHOICES	RESPONSES	
Nothing to worry about	1.23%	1
The result of normal coastal processes	14.81%	12
Likely to get worse in the future	38.27%	31
Something needing urgent attention in Kāpiti	35.80%	29
Other (please specify)	9.88%	8
<b>TOTAL</b>		<b>81</b>

#	OTHER (PLEASE SPECIFY)	DATE
1	What do you mean by Coastal hazards? Urgent, effective, climate change action is needed.	1/5/2021 4:26 PM
2	Council has allowed infrastructure to degrade then hides behind global warming which while real is not actually the cause of the issues	1/3/2021 10:28 AM
3	Poor question: Coastal hazards are a result of normal processes, they will get worse in the future, and, with the rate of decision making within KCDC, are needing urgent attention	12/27/2020 5:01 PM
4	This is a misleading question, each of the four options should be a different questions. My answer would be 1 and 2, and totally against 3 and 4.	12/27/2020 4:49 PM
5	The diversity of the Kapiti costal area can allow for all the above boxes to be ticked	12/23/2020 3:08 PM
6	All except the first. Some matters (erosion in Raumati, the state of some seawalls) need urgent attention, although they are affected by normal coastal processes, because KCDC has neglected them for decades. Sea-level rise will have noticeable effects along the entire shore (and underground for quite some way inland) over the next 50-500 years, with not much of significance over the first several decades.	12/22/2020 8:53 PM
7	Well warned about. To be expected but not paid for in any way by the public. As the coast moves inland that will impact on the water KCDC uses for households. Given it any thought?	12/22/2020 5:24 PM
8	Need to stop allowing new builds by the coast!	12/22/2020 3:05 PM

## Q8 Would you like to be involved in the Takutai Kāpiti project?

Answered: 77 Skipped: 11

ANSWER CHOICES	RESPONSES	
Yes	44.16%	34
No	15.58%	12
I don't have enough information to decide	31.17%	24
Other (please specify)	9.09%	7
<b>TOTAL</b>		<b>77</b>

#	OTHER (PLEASE SPECIFY)	DATE
1	I would like to be involved but have a fear of process becoming bogged down and resulting in nothing more than a tick in the box for council rather than council taking a true leadership role	1/3/2021 10:36 AM
2	Yes, if I can see somewhere I can contribute and the process is not hijacked by a "special interest group"	12/27/2020 5:05 PM
3	I'd prefer not to be involved in any processes involving predetermined political outcomes. Which is how the Takutai Kāpiti project appears to both myself and other coastline residents.	12/23/2020 5:07 PM
4	There are many coastal residents that have an understanding, and experience of, coastal variables. I am not one of them but hope the panel will take advantage of the skills such people offer.	12/23/2020 3:15 PM
5	Inappropriate for me to be involved.	12/22/2020 6:10 PM
6	Haven't a clue what that title means. Erode Kapiti, perhaps...	12/22/2020 5:25 PM
7	N/A	11/17/2020 1:50 PM

## Q9 How would you like to be updated on the Takutai Kāpiti project?

Answered: 75 Skipped: 13

ANSWER CHOICES	RESPONSES	
Attend community "drop in" sessions throughout the duration of the Takutai Kāpiti project	14.67%	11
Via the dedicated Takutai Kāpiti website	24.00%	18
Via the Takutai Kāpiti newsletter	44.00%	33
I do not want to be updated	4.00%	3
I don't know	5.33%	4
Other (please specify)	8.00%	6
<b>TOTAL</b>		<b>75</b>

#	OTHER (PLEASE SPECIFY)	DATE
1	Email	12/23/2020 3:06 PM
2	You need to work with the community. Publish it well in advance and get buy in	12/23/2020 2:52 PM
3	Need more than one option for this question. I would attend drop in session when possible, would read an email newsletter and probably visit the web site.	12/23/2020 2:22 PM
4	Via KCDC news & website	12/23/2020 8:01 AM
5	Occasional items in the regular weekly Council newsletter are likely to be sufficient.	12/22/2020 8:55 PM
6	for what purpose? To increase frustration?	12/22/2020 5:25 PM

**Q10 If you answered yes to Question 8, why would you like to be involved in the Takutai Kāpiti project?**

Answered: 36 Skipped: 52

## Kāpiti Coastal Hazard Survey

#	RESPONSES	DATE
1	I live on the coast	1/19/2021 3:04 PM
2	Because I live on the coast	1/18/2021 2:58 PM
3	I was involved in CRU regarding the Shand report/s and would like to continue. I have a PhD in Geology.	1/11/2021 12:20 PM
4	This is the first I have heard of this project. I am involved in volunteer work so need to find out more first as can be easily overcommitted	1/5/2021 4:29 PM
5	See my comments above	1/3/2021 10:36 AM
6	The development of coastal occupation and periodic use is a constant dichotomy. Impact by people in the environment is also significant for long term stability of both.	12/28/2020 8:59 AM
7	Live close to the coast and have seen the changes along the coast - erosion along Rosetta Road in the 70s and between Paraparaumu Beach and Raumati a year or so ago and still KCDC permits expensive seafront development - short sighted	12/27/2020 5:05 PM
8	I have formed Tikotu Estuary Guardians (Taranaki Coastal Plan) and have an interest in that site specifically	12/26/2020 7:09 PM
9	There is a need to "think globally, act locally"	12/26/2020 6:15 PM
10	I have an interest with coastal erosion, aggradation and remedial action.	12/26/2020 12:48 PM
11	Because hope that is used deliberative democratic processes to help the community make decisions. The educational value of these processes, the community engagement and the empowerment that results from this is immense.	12/25/2020 2:54 PM
12	Consider being an active volunteer	12/24/2020 2:09 PM
13	because it is important that correct actions are taken with some urgency	12/23/2020 7:35 PM
14	keen to promote the preservation of the Kapiti Coast in as practical and appropriate ways as possible.	12/23/2020 5:20 PM
15	To change the imbedded racism	12/23/2020 3:06 PM
16	Everyone's responsibility.	12/23/2020 2:52 PM
17	Because I am an affected property owner.	12/23/2020 2:27 PM
18	It is time that local government started taking this seriously and if I can help I will. I'm not sure I have any special skills to offer though	12/23/2020 2:22 PM
19	As a resident and homeowner in Raumati South, I have a vested interest in the decisions that are made about our coast. This is NOT just about beachfront homeowners!	12/23/2020 2:20 PM
20	Because I feel the past attempts to deal with these issues, by KCDC, have been very one sided with surveys targeted to getting outcomes that KCDC want rather than what the community wants.	12/23/2020 1:04 PM
21	It affects me and my property.	12/23/2020 12:56 PM
22	Because coastal erosion is a matter for everyone living on the coast to support and help.	12/23/2020 11:35 AM
23	To encourage urgency in climate adaptation action	12/23/2020 6:52 AM
24	Because restoration of natural processes and indigenous biodiversity are the best responses to coastal changes caused by climate change.	12/22/2020 11:48 PM
25	My family live very near the beach and expect to be long term residents here. We also own 2 properties. We want to understand impacts and ensure that Kapiti is well prepared for the challenges ahead.	12/22/2020 9:37 PM
26	A lifetime interest in the hydrology of the Kapiti coast, the effects of tides and floods, and a healthy interest in contributing to the future of our community as the effects of climate change become apparent .	12/22/2020 9:16 PM
27	Beacuse the issues affect me personally	12/22/2020 7:22 PM
28	I didn't. I don't want to.	12/22/2020 5:25 PM
29	I believe that it is important that the community has an opportunity to work alongside CAP, and to help formulate potential options for Council's consideration.	12/22/2020 4:44 PM

## Kāpiti Coastal Hazard Survey

30	Because Council has failed to address this for 20 years	12/22/2020 4:39 PM
31	I am interested in climate change and adaptation plus i live on the coast	12/22/2020 3:43 PM
32	Its an important issue, and needs to proceed, but taking community along with it.	12/22/2020 3:27 PM
33	To stay informed about things happening in my neighbourhood	12/22/2020 3:21 PM
34	Because climate change is the biggest challenge facing Kāpiti and we need to make sure we rise to meet it, not simply sit idle and hope for the best	12/22/2020 3:12 PM
35	Keen to understand the issues that we are experience and contribute where possible	11/25/2020 9:49 AM
36	Because I want to ensure future generations have access to the beach and that it retains a natural landscapes.	11/17/2020 1:21 PM
